

\$BikCoin Paper

Abstraction

In the world of cryptocurrencies, BikCoin stands out for its uniqueness. BikCoin aims to create a decentralized ecosystem that promotes and celebrates sustainable transport. This document outlines our mission, technology and future plans, bringing together cycling enthusiasts and those interested in our sustainability. BikCoin aims to become the leading cryptocurrency for sustainable transport and to create a community that shares our values. We hope that our approach to cryptocurrency and cycling will help create a more sustainable future for us all

Vision

At BikCoin, we envision a world where cryptocurrency is no longer just a tool for financial transactions, but a key element of sustainable living. Inspired by the culture of cycling, our coin seeks to realize a philosophy of freedom and exploration. We believe that by creating a decentralized ecosystem that encourages the use of bicycles for transportation, we can help protect the environment and create healthy public spaces

Mission

- 1) **Promote cycling culture** our main goal is to inspire people around the world to use the bicycle as an enjoyable and practical means of transport. We plan to hold educational events, organize community events and work with other cycling organizations to create an active and vibrant cycling culture
- 2) **To incentivise sustainable behavior**, we plan to use the blockchain to reward BikCoin users for every mile they cycle. These rewards will be redeemable for a variety of benefits, including discounts on cycling equipment, access to exclusive events, and carbon reduction credits to encourage greener choices in everyday life

- 3) **Building a global community.** We want to build a global community of cyclists who share our mission to create a greener, healthier planet. Through our online platform, social media and local cycling groups, we provide a space to connect, share experiences and support each other's journeys by bike
- 4) **Drive Innovation in Transportation.** As advocates for sustainable transport, we are committed to driving innovation in the bicycle industry. Whether it's developing new bike technologies, implementing smart infrastructure solutions or advocating for bike-friendly policies, we are committed to pushing the boundaries of what's possible and creating a world where cycling is accessible to everyone

Technology and Innovation

BikCoin embodies the idea of sustainable transport, and we use cutting-edge technology to make it happen. At the heart of our system is blockchain, which brings transparency, security and decentralization to payments and rewards. We are committed to improving existing cycling technology and developing innovative solutions, such as integrating smart bike lanes that sync with our app to track miles traveled and bike traffic. Our technology enhancements improve cycling infrastructure and urban mobility in general

Community and Partnerships

The heart and soul of BikCoin is our community. A group of people passionate about bicycles, the environment and sustainability. We are actively working to expand our influence by using social media, organizing events and collaborating with local and global cycling communities. Our goal is to build a strong support network where members can share their experiences, ideas and achievements. In addition, we are looking for strategic partnerships with city governments, environmental organizations and companies that share our goal of making cities more bike-friendly and sustainable. Team is a huge part of BikCoin community. Who is building BikCoin project?

BikCoin has a global team with self-motivated development

BikCoin holders are from all over the world. The work is completed around the clock with various aspects of the project and events being worked on simultaneously. Our wide and vastly different life experiences contribute to making our community diverse in

nationality and thought. Anyone can step up to the plate and volunteer in capacities that are needed. This is true community building with leadership that emanates from inside the comfort and efforts of our BikCoin family.

The community itself is composed of multiple established and emerging teams. One of the biggest advantages of BikCoin is that each team can develop its own applications to empower the entire BikCoin community as a whole.

BikCoin Token (\$BIK)

BikCoin (\$BIK), based on the **Binance Smart Chain (BSC)** blockchain token standard BEP-20. This solution combines the speed and flexibility of the BSC with the goals of sustainability and supporting the cycling community

Max total supply - 1 billion \$BIK tokens to ensure sustainability and a long-term value proposition. This offering provides enough volume to reward participants and support ecosystem growth, while remaining limited to preserve the value of

the token

\$BIK utilities:

1. **Rewards for bicycle mileage.** Users receive a \$BIK for every kilometer cycled, which motivates them to use their bicycles more actively
2. **Discounts and partner programs.** \$BIK holders have access to discounts on cycling equipment, services and accessories from partners.
3. **Access to exclusive events.** \$BIK tokens can be exchanged for tickets to events organized by BikCoin, such as bike races, festivals and professional meetings

Conclusion

This documentation presents BikCoin. Unlike its counterparts, BikCoin wasn't just about financial transactions; it was about embracing a lifestyle, a philosophy of freedom and exploration. Together, we are contributing to an ecosystem that rewards sustainable lifestyle choices. We encourage you to join us on this journey - whether you are a cycling enthusiast, environmentalist, innovator, or investor.
